## **Discover ArcelorMittal's latest developments at Hannover Messe**

Hannover, 8 April 2015 - ArcelorMittal will highlight its latest products and innovative developments for the energy sector at Hannover Messe 2015 from 13 to 17 April 2015. ArcelorMittal Europe – Flat Products and ArcelorMittal Europe – Long Products will be present at the national pavilion of Luxembourg on stand B10 in Hall 13.

As the world's biggest industrial fair, Hannover Messe covers all aspects of the industrial value chain. Steel marks the beginning of many value chains. It is an essential material for our everyday life, our industry and the success of our country. ArcelorMittal will be presenting a complete range of products and solutions relating to each step of the energy lifecycle, from production to transformation and transport.

### **Coatings for solar steel structures**

ArcelorMittal Europe – Flat Products will showcase a dedicated offer for solar energy generation systems from metallic coated steels, such as the Magnelis® coating which guarantees 25-year durability for solar steel structures and offers self-healing on cut edges against corrosion.

As the leading supplier of steel solutions for the global wind energy industry, ArcelorMittal will present its full product range at the fair. This includes heavy plates used to construct both the tower and the jackets that anchor offshore turbines on the sea floor as well as electrical steels for the medium and high-power generators sitting at the top of the wind tower. These steels possess all of the required magnetic properties to maximise the amount of energy each turbine can produce.

At Hannover Messe, ArcelorMittal will also showcase its extensive product portfolio of steels and solutions for upstream, midstream and downstream oil and gas. The group is providing steels for the global oil and gas pipeline industry for more than 30 years – a success which is largely due to the ability to consistently produce quality steels with the required properties, time and time again.

## **Greater heights for wind towers**

ArcelorMittal Europe – Long Product's extensive offer for the energy sector includes a new range of big angles for lattice towers which brings increased stiffness to reach the greatest heights up to 180 meters. Greater height also allows for greater power generation by giving access to stronger but less turbulent winds, especially at onshore wind farms. The group's success in the highly demanding energy sector is underpinned by a close customer contact, an experienced engineering support and R&D services to develop innovative products, steel processing solutions and projects.

## **About Hannover Messe**

Hannover Messe is the world's biggest industrial fair. Around 6,000 exhibitors present key topics such as industrial automation, energy technology, power transmission and control, mobility, subcontracting, future technologies and talent. The opportunity to develop new sales leads in other sectors, unique access to new products and technologies as well as a huge international presence attract exhibitors and visitors from all over the world. Around than 180,000 visitors from more than 100 different nations have attended the trade fair in 2014, among them a high percentage of industry professionals, top buyers and decision-makers.

## **About ArcelorMittal**

### *Germany*

*With a production volume of around 7 million tonnes crude steel, ArcelorMittal is among the largest steel producer in Germany. Its customers come from the automotive, construction and packaging industry, household appliances also belong to ArcelorMittal's customers in Germany. The group runs four large production sites in the country. These are two fully integrated flat carbon sites in Bremen and Eisenhüttenstadt as well as two long carbon sites in Hamburg and Duisburg. Moreover the group has seven steel service centers and 16 distribution centers in the federal republic. ArcelorMittal employs more than 9,000 people in Germany.*

### *Worldwide*

*ArcelorMittal is the world's leading steel and mining company, with a presence in more than 60 countries.*

*ArcelorMittal is the leader in all major global carbon steel markets, including automotive, construction, household appliances and packaging, with leading R&D and technology. The Group also has a world class mining business with a global portfolio of over 20 mines in operation and development, and is the world's 4th largest iron ore producer. With operations in over 22 countries spanning four continents, the Company covers all of the key industrial markets, from emerging to mature, and has outstanding distribution networks.*

*Through its core values of sustainability, quality and leadership, ArcelorMittal commits to operating in a responsible way with respect to the health, safety and well-being of its employees, contractors and the communities in which it operates. It is also committed to the sustainable management of the environment. It takes a leading role in the industry's efforts to develop breakthrough steelmaking technologies and is actively researching and developing steel-based technologies and solutions that contribute to combat climate change. ArcelorMittal is a member of the FTSE4Good Index and the Dow Jones Sustainability World Index.*

*In 2014, ArcelorMittal had revenues of \$79.3 billion and crude steel production of 93.1 million tonnes, iron ore deliveries amounted to 63.9 million tons.*

*ArcelorMittal is listed on the stock exchanges of New York (MT), Amsterdam (MT), Paris (MT), Luxembourg (MT) and on the Spanish stock exchanges of Barcelona, Bilbao, Madrid and Valencia (MTS).*
